Aerospace Services

GKN is a global company focused on the automotive and aerospace sectors, operating in over 30 countries and employing more than 37,500 people.

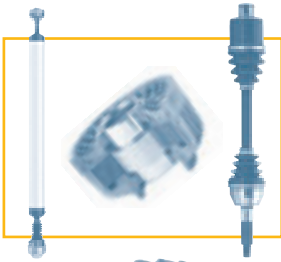

In the automotive sector, GKN is

- the world leader in driveline systems and components and the world number one in the production of constant velocity sids shafts
- the world leader in powder parts production and US number one in powder manufacture
- the world leader in the supply of power-take-off shafts and wheels designed specifically for off-highway applications
- the world leader in metal substrates for catalytic converters, through 50% ownership in Emitec.

In the aerospace sector, GKN is

- leading supplier to the aerospace industry
- the world number one independent supplier of composite structures.

GKN Automotive

GKN Driveline

Sideshafts, propshafts, torque management devices, geared components

Powder Metallurgy

Powder part production, powder manufacture

OffHighway Systems

Power-take-off shafts, wheels

AutoComponents

Suspensions, chassis structural systems, engine cylinder liners

Emitec

Metal substrates for catalytic converters

GKN Driveline's Mission

Our mission is to design and manufacture superior driveline products supported by the best customer service. By doing this we will create value for customers and shareholders.

GKN Driveline

GKN Driveline is the largest business within GKN, and a world leader in the design and production of driveline components and systems. The business produces sideshafts, propshafts, mechanically and electronically controlled torque management systems and geared components.

The GKN Driveline range covers every application from entry level front-wheel drive vehicles to the most sophisticated all-wheel drive models. 21,000 people are employed at 49 locations in 31 countries, with strategically sited research and product development centres supporting major vehicle manufacturers throughout the world.

Shanghai

Shanghai GKN Drive Shaft was established in 1988 as a joint venture. GKN Driveline's joint venture partner is the Shanghai Automotive Industry Corporation (SAIC).

It manufactures sideshafts and propshafts for the Chinese market as well as for customers outside China. Precision forming production was set up in 2002.

Jilin

Jilin GKN Norinco Drive Shaft was founded in 1996 as a joint venture. GKN Driveline's joint venture partner is JMM (a subsidiary of Norinco).

It manufactures sideshafts for the Chinese market as well as for customers outside China.

Fujiwa

Fujiwa Machinery Industry in Kunshan was established in 1995 as a joint venture. The joint venture partner is Lioho Machine Works.

It manufactures final drive units, brake drums and fly wheels.

GKN Driveline in China

GKN Driveline is a premier partner of the automotive industry worldwide, producing driveline components for leading vehicle manufacturers from 49 locations in 31 countries. 21,000 GKN Driveline people focus their energy and imagination on finding new ways to provide added value for customers, drawing on the world's widest range of driveline components and technologies to engineer total systems that deliver improved performance, for vehicle configurations.

In 2004, GKN Driveline acquired Tochigi Fuji Sangyo who are the joint venture partners in Fujiwa Machinery Industry in Kunshan.

Our roots in the Chinese automotive market go back to the 1980s. Forging strong partnerships based on supply reliability, product integrity and quality consistency. Today, we share our unique application capability with our customers to develop dedicated driveline solutions that meet the challenge of improved environmental performance, greater efficiency, lighter weight and enhanced reliability.

GKN Driveline:
partners in performance;
partners in progress;
partners in China.
