

## GKN Driveline in the USA

U S A

## Partners in performance

GKN Driveline is a premier partner of the automotive industry worldwide. Producing driveline components for leading vehicle manufacturers from 49 locations in 31 countries. 21,000 GKN Driveline people focus their energy and imagination on finding new ways to provide added value for customers, drawing on the world's widest range of driveline components and technologies to engineer total systems that deliver improved performance, for many vehicle configurations.

Our roots in the North American automotive market go deep. Forging strong partnerships based on supply reliability, product integrity and quality consistency. Today, we share our unique application capability with our customers to develop dedicated driveline solutions that meet the challenge of improved environmental performance, greater efficiency, lighter weight and enhanced reliability.

### Alamance

GKN Driveline Alamance was established in 1981 and produces sideshaft components.

## Partners in progress

Our commitment to the automotive industry in the USA continues to find better ways, new technologies, improved products.

# Auburn Hills

GKN Driveline Auburn Hills was established in 1987. Sales and marketing work closely with a team of specialist engineers in the research and product development center to improve the performance of automotive driveline systems.

# Columbia

GKN Driveline Columbia was acquired in 2000 and manufactures propshafts for passenger cars and SUVs.

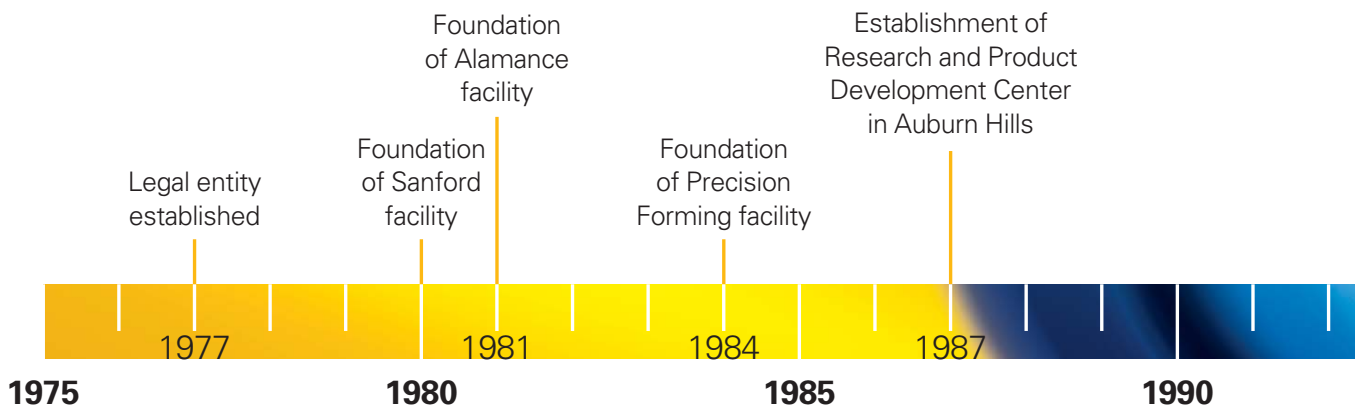

# Bowling Green

Bowling Green was established in 1998 by Tochigi Fuji Sangyo (TFS) and manufactures torque products.

## GKN Driveline Timeline USA

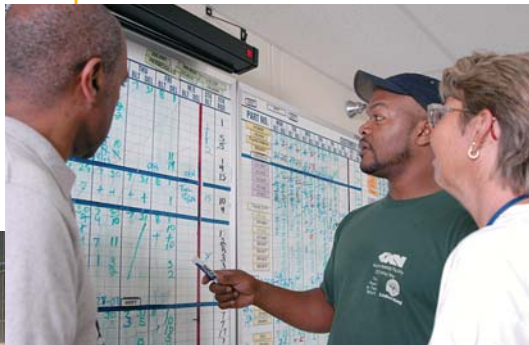

## Durham

GKN Driveline Durham is the administration center for the GKN Driveline Americas region. The locations in South America and Mexico are managed from here.

## Roxboro

GKN Driveline Roxboro was established in 1994 and is the final assembly location in the USA for all sideshaft production.

## Sanford

GKN Driveline Sanford was established in 1980 and manufactures sideshaft components.

In 1984 a second factory was set up on the site which manufactures precision formed parts for GKN Driveline.
