

FlexBoots

> GKN FlexBoots

Sometimes an immediate solution is required:
a driveshaft boot is defective and you do not have the appropriate vehicle specific replacement part at hand.
Even if this is the case you can still obtain the reliable quality of GKN boots. GKN offers different types of FlexBoots - the fast alternative!

> The fast solution: GKN FlexBoots

A defective driveshaft boot should generally be replaced by the GKN replacement part specifically developed for the respective joint. In case you don't have the correct replacement boot at hand or it is no longer available to the market the GKN FlexBoots is your first choice.

FlexBoots

Joint specific FlexBoots:
universally usable and yet most
similar to OE boots

- > Vehicle-related boots with TecDoc assignment
- > Tailored to the vehicle and require no trimming
- > Constantly extended application programme with currently 1800 applications
- > Our demands are not just to copy original parts
- > They are produced in high elasticity neoprene of high quality and high resistance to ozone, stress and low temperatures
- > The boots can be mounted through the use of a plastic cone or of the modern clickgun
- > All kits include: 1 boot, 2 universal clamps with holes and 80gr grease

> These boots always fit

All GKN FlexBoots are flexible and can therefore be mounted with a cone or a boot slider. The constant velocity joint does not have to be disassembled!

> GKN range of joint specific FlexBoots

GKN part no.	$\varnothing 1$ (mm)	$\varnothing 2$ (mm)	L (mm)
190963	25	79	80
190964	20	73	97
190965	27	84	100
190966	23.5	78	89
190967	29	67	79
190968	25	73	83
190969	23	59	90
190970	21	67	88
190971	24	92	83
190972	24	84	102
