Original GKN Parts

SPIDAN SX Countertrack joints

➤ SPIDAN SX Countertrack joints

Pioneering technology

- GKN is a joint supplier to vehicle manufacturers
- GKN is the only company on the free spare parts market to offer new countertrack technologies in OEM quality

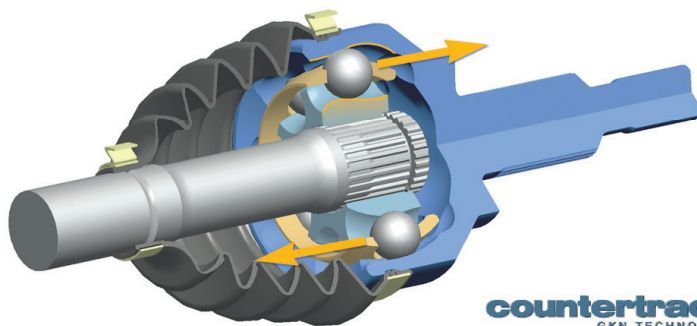

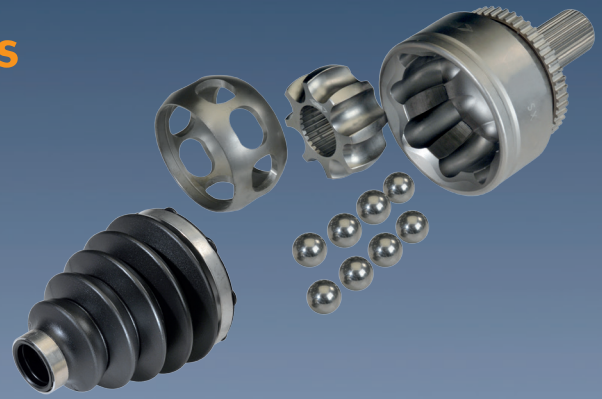

Main features

- Bending angle greater than 50°
- Weight is reduced by 15 per cent with higher power values
- Power loss is reduced by 30 per cent over the entire bending angle
- Thanks to the reduced heat level, up to 25 per cent greater torque can be accepted and transferred

> SPIDAN SX Countertrack joints

SX joints are distinguished by a characteristic S-shaped track profile and the counter-running ball tracks – hence the name “Countertrack®”. This innovative design makes it possible to reduce internal friction, heat and size and to increase the transferable torque and maximum bending angle.

The orange contour shows the S-shaped track profile of the ball track. The arrows show the opposite opening direction of the ball track in the GKN Countertrack® joint.
